Who we are and what we do

In 1981, HAASE Energietechnik AG was established in Neumuenster, Germany. The focus of activities is on environmental engineering and plant construction including a wide range of services.

This is how we work

Headquarters and production facilities of HAASE Energietechnik are located in Neumuenster. HAASE also operates a growing number of plants on the basis of O&M schemes. Abroad, we are represented by local partners.

Innovative products and services

account for HAASE Energietechnik's success and leading market position. Today, HAASE process technology is installed on more than 1,000 sites throughout Europe, Asia and Africa.

Our special strength

results from our wide-ranging manufacturing penetration with own resources in the fields of gas engineering, water treatment, biogas engineering, landfill engineering, and power generation.

Our long-term experience makes us ideal partners for integrated cross-platform solutions.

Plug-and-play

Most HAASE facilities can be supplied in containerised units: CHP facilities, boosters, membrane systems. They are mobile, easy to ship and ready for connection on site. Facilities for stationary installation are supplied on skid.

Technical and commercial services

complete our portfolio. Project development, contracting solutions as well as service & support are part of our reliable full-service concept.

Certification

HAASE Energietechnik AG ist certified according to DIN EN ISO 9001 : 2000

Gas Engineering

Combustion, purification, upgrading and utilisation of biogas, landfill gas, sludge gas, special gas, exhaust gas: Booster stations, flare stacks, BiogasUpgrader, VocsiBox®

Power Generation

Cogeneration plants (CHP) for biogas, landfill gas, sludge gas, natural gas

Water Treatment

Membrane systems for the treatment of landfill leachate and process water from MBT plants and industrial processes

Biogas Engineering

Biogas plants for renewables; Cofermentation; Biomethane plants; Components for biogas plants

Landfill Engineering

Collection systems for landfill gas and landfill leachate; Expert assessment and rehabilitation of old landfill sites

Services

Project development; Rental schemes, BOT, O&M; Contracting; Landfill aftercare; Service & Support
